Safe Families *for* Children

Resource Friend

FACT SHEET

A Resource Friend provides tangible goods or services to support families or others in the Circle of Support.

Giving Your Time, Talent and Treasure

While Hosting or Family Friending may not be an option for your family right now, there are many ways to come alongside families by providing resources that reduce stress and help create stability. Resource Friends use their personal resources, networks, or professional services to support and encourage families and Safe Families volunteers within the Circle of Support.

When families have both ongoing relationships and access to resources, they are better equipped to navigate difficult circumstances with greater resilience.
